## What Advertising Does

Like a great many others who saw its value and proceeded to take advantage of it, the late Joseph Beecham, of England, stands forth as one of the great advocates of newspaper advertsing. He began life as a poor boy but afterwards engaged in the manufacture of pills from which he amassed a great fortune. He realized his opportunity for developing his business lay in reaching the largest number of people and after a long list of experiments he came to the conclusion that the newspapers and magazines were the most satisfactory business getting mediums.

The result was that he stuck faithfully to them. He didn't try one or two ads, and then stop, but he kept steadfastly at it and made his name familiar in every household. At his death he was worth \$140,-000,000 and it was the direct result of his advertising.

Everyone of course cannot become a Beecham, but the lesson conerning advertising holds good for everyone who has something to sell. Put forth honest goods and let the people know it every day. The more that can be reached the better and when it comes to rendering such service there is no medium in Eastern Connecticut which can equal The Bulletin
